Identifying muscle segments in beef loin, slaughter weight and ageing time implications

Advantages to use different adipose deposits in bulls of the Spanish breed to improve body muscle mass

Carcasses and meat quality of paintings bulls as affected by the use of chelating agents and trienoidal compounds with antioxidant activity

Fatty acid composition and sensory traits of beef fed palm oil supplements

European cattle breed classes according to their meat quality parameters

Link weight, body size and carcass characteristics of young bulls of fifteen European breeds

Effect of early feeding on performance, carcass and meat quality of spring-born bull calves raised in dry mountain areas

Meat and fat colour as a tool to trace grass-feeding systems in livestock production

Near-infrared reflectance spectroscopy for predicting chemical, instrumental and sensory quality of beef

Determining variability and relationships for 41 carcass and meat traits in Iberian cattle

Lacunar-graing compared with concrete feeding slightly modifies carcass and meat quality of young bulls

Preserving meat yields and commercial meat cuts from carcasses of young bulls of Spanish breeds by the SEEDROP method and an image analysis system

Carcass characteristics of the same beef breed castro magalhães: Effects of sex type [Carcasses and meat characteristics of suckling lambs from Suckling lambs: Sex effect]

Relationship between collagen characteristics, lipid content and raw and cooked texture of meat from young bulls of different European breeds

Potential production of the same bovine serrana de teruel, resulting from selection [Potential production of the bovine serrana de teruel breed, preliminary report]

Influence of feeding system on carcass and meat quality fat colour on a basis of classification

Influence of aflatoxin-based feeding systems on carcass fat colour and meat quality of Iberian pigs

Atlas of the distribution of the Canal of the rumenites in Iberian cattle: distribution of the degenerative causes [Atlas of the distribution of rumenite cases]

Influence of diet composition on the diet of cattle in the Teruel: Effects of total nitrogen content and protein content of the diet [Influence of diet composition on the diet of cattle in the Teruel: Effects of total nitrogen content and protein content of the diet]

Influence of the diet composition on the diet of cattle in the Teruel: Effects of total nitrogen content and protein content of the diet [Influence of the diet composition on the diet of cattle in the Teruel: Effects of total nitrogen content and protein content of the diet]

Influence of diet composition on the diet of cattle in the Teruel: Effects of total nitrogen content and protein content of the diet [Influence of diet composition on the diet of cattle in the Teruel: Effects of total nitrogen content and protein content of the diet]
